

## **How do small steps create real change?**

At Żabka, we understand the great importance of small steps. That's why, in pursuing a circular economy, we want to make the most of waste collection and recycling.

After many months of preparation and a pilot in five Polish cities, and in line with the goals of our Responsibility Strategy, we have decided to voluntarily include all Żabka stores in the national deposit system.

Thanks to this, from the first of October, customers can return not only the glass deposit bottles previously accepted, but also plastic bottles and cans.

What conditions must be met? The packaging should be uncrushed and have a readable barcode. And importantly – no proof of purchase is required when returning the packaging. Items can be returned directly to the shop assistant or via the dedicated machines in selected stores.

In return for packaging covered by the deposit, customers receive 50 groszy for cans and plastic bottles, and 1 złoty for reusable glass packaging.

Together with our customers, we are proving that these small steps truly do make a big difference.
